

Client Meeting Lucky Spinner 2nd August 2024

1) Notification of Correct Wrong Selection

Notification does not appear: You do not have enough points to correct the wrong choice (in Live Stream “when requesting a QR code” but in Studio the notification appeared successfully).

Notification does not appear: You do not have enough points to correct the wrong choice (in Live Stream “when requesting a QR code” but in Studio the notification appeared successfully).

We confirmed this point on 8 April 2024.

Note:

Dxb backend development team will work on this

2) Delete competitions after starting time

8. It is not possible to delete, hide, or modify the competitions after the starting time in the admin panel, and its keep showing in the mobile application.

I need an action to edit or hide it.- need more work on this
now we plan to delete the entire contest from admin

Notification does not appear: You do not have enough points to correct the wrong choice
(in Live Stream “when requesting a QR code” but in Studio the notification appeared successfully).

We confirmed this point on 8 April 2024.

Note:

We decided to enable the delete button in admin panel in between the competition

3) Color change of Join button

The “Join” button in the competition poster appears in Yellow.
here we use blue join - if time if time left for join,it turns to green if i already joined, if i didn't joint within time button color blue with text join to live

The “Join” button in competition poster appears in Yellow..

We confirmed this point since 2 years 🙌

Note:

We agreed to change the color of the join button to yellow in the home screen and detail screen.Only the color will change, other actions will be the same as of now.

4) LiveStage Issues

4.1) Joined button from home screen need to be enabled now it is disabled

4.2) In between the competition I pressed the back button and tried again to join the competition. It asked to scan qr code again,but there was no need to scan if I already joined, scanning only needed once.

4.3) push notification before 5 minutes of starting time of the contestant its not working now

Note:

We agreed to fix these things

5) Live Studio Issues

5.1) push notification of winning message 2nd position not coming

Note:

We agreed to fix these things

6) Correct wrong Selection Flow Change

Yes in the last meeting he ask to change the flow of correct wrong selection, Join button color change issue and some other points

mentions in whatasapp group. new requirement

click on correct wrong selection

it need to open the invite page

no need of red section stay in current stage- after if anyone accept it turns to green- change request after 24 hours change wrong

selection will again back to normal as first if some one not joined

we will check and let u know

Note:

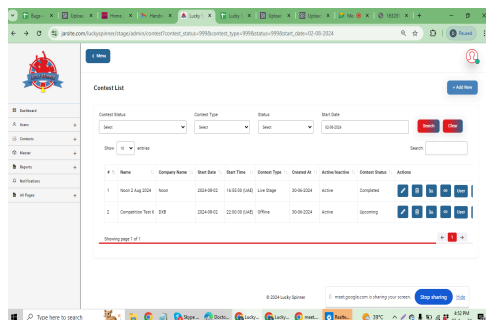

Need to go through this scenario. We will let u know after discussing with the development team

6)Created competition completed before starting

Scenario

Edited existing upcoming competition to current date and time for live stage

Contest then showing like this

Note:

Need to fix this
